O'ZBEK TILINING  
SO'Z YASALISHI O'QUV  
LUG'ATI

(*maktab o'quvchilari uchun*)

Toshkent-2007

*Lug‘at, avvalo, o‘rta maktab o‘quvchilari uchun mo‘ljallangan. Lug‘atdan ona tili va adabiyot fani o‘qituvchilari, filolog talabalar va, qolaversa, o‘zbek tili bilan qiziquvchi keng o‘quvchilar ommasi ham foydalanishlari mumkin.*

Mas’ul muharrir

## SO‘ZBOSHI

Kuchli va ayovsiz raqobatga asoslangan bozor iqtisodiyoti tadbirdor, ijodiy taffakkur sohibi bo‘lgan, har qanday qiyin vaziyatdan o‘z aql-idroki bilan omon chiqa oladigan mustaqil fikrli, shu bilan birga, shuurida milliy ruhi mustahkam shaxsni tarbiyalashni talab qiladi.

Inson shaxsida ruh, tafakkur va til chambarchas bog‘liqdir. Demak, ijodiy va mustaqil taffakkurli shaxs tarbiyasida ona tili va uning ta’limini tashkil etuvchi vositalarning roli beqiyos.

Ma’lumki, o‘rta maktab ona tili ta’limining konseptual asoslarida uning zaruriy vositasi ikkita ekanligi ta’kidlanadi: darslik va lug‘atlar. O‘quvchilarning ijodiy tafakkurini va nutqini o‘stirishning zaruriy omillaridan biri lug‘atlar ustida ishlashdir. Lug‘atlar o‘quvchilarning ijodiy tafakkuri, mustaqil fikrlash darajasi, ijodiy fikr mahsulini og‘zaki va yozma shakllarda ravon bayon etishga olib keladigan behad qimmatli va boy so‘z zahirasini vujudga keltiradi. Bugungi kunda rivojlangan mamlakatlarda ta’limning har bir bo‘g‘ini uchun (bog‘chadan tortib, universitetgacha) yuzlab lug‘atlarning maxsus turlari yaratilgani, hatto rus maktablari uchun 30 ga yaqin o‘quv lug‘atlari mavjud bo‘lgani holda o‘zbek maktablari uchun bitta «Imlo lug‘ati» bor, xolos. Maktablar uchun izohli lug‘at, ma’nodosh so‘zlar lug‘ati, antonimlar lug‘ati, darajalanish lug‘ati, eskirgan so‘zlar lug‘ati, shevaga xos so‘zlar lug‘ati, iboralar lug‘ati, so‘zlarning birikuvchanlik lug‘ati, uyadosh so‘zlar lug‘ati, shakldosh so‘zlar lug‘ati, so‘z tarkibi lug‘ati, talaffuzdosh so‘zlar lug‘ati, shuningdek, har bir fan bo‘yicha alohida terminologik lug‘atlar va qomuslar yaratish dolzarb vazifadir.

O‘quvchilar uchun zarur lug‘atlar yaratilmas ekan, ijodiy tafakkurni rivojlantirish mumkin emas, og‘zaki va yozma nutqni o‘stirish vositasi bo‘lgan joriy darsliklar o‘z vazifasini to‘la bajara olmaydi. Bu o‘rta ta’lim bo‘g‘ini uchun mavzuviy o‘quv lug‘atlarini yaratish tamoyillarini ishlab chiqish va tuzishni taqozo qiladi.

Qarshi davlat universiteti o‘zbek tilshunosligi kafedrasi professor-o‘qituvchilari Qashqadaryo viloyat pedagog xodimlarni qayta tayyorlash va malakasini oshirish instituti bilan hamkorlikda maktablar uchun mavzuviy o‘quv lug‘atlarini ishlab chiqishdek sharafli vazifani o‘z zimmalariga oldilar va buning natijasi o‘laroq kelajagimiz faxri bo‘lgan maktab o‘quvchilarini uchun shu tipdagи o‘quv lug‘atlarini turkumi yaratildi.

O‘quv lug‘atlarini tajriba sifatida birinchi marta nashr qilinayotganligi uchun kitobxonlar muhokamasiga havola etiladi. Lug‘atlar haqidagi fikrlaringizni mammuniyat bilan qabul qilamiz.

Manzil: Qarshi shahri Ko‘chabog‘ ko‘chasi, 17- uy.

## KIRISH

Til ichki va tashqi manba asosida boyib boradi. Ya'ni chetdan so'z o'zlashadi yoki til ichki imkoniyati asosida – so'z yasalishi bilan yangi ma'noni bildiruvchi birlik (leksema) paydo bo'ladi. Shundan so'z yasalishi – tilda bor bo'lgan material va imkoniyat asosida yangi so'z hosil qilishni, lug'at tarkibining boyishini nazarda tutadi. Ana shu so'z yasalishi bilan bog'liq lug'at tilimiz rivojini o'rganish va o'rgatishda muhim manba bo'lib xizmat qiladi.

Hozirgacha o'zbek tilida so'z yasalishi haqida talay ishlar qilinganiga qaramay, umuman bunday lug'at tuzilmagan. Shuni nazarda tutib, birinchi tajriba sifatida "O'zbek tilining so'z yasalishi o'quv lug'uti"ni tuzdik.

Bu lug'at maxsus, o'ziga xos lug'at turi hisoblanadi. U yasama so'zning qanday va nima vositasida yuzaga kelganligini bilsinga yordam beradi. Masalan, *amal* so'zidan beshta yangi so'z va bu yangi so'zdan yana beshta boshqa yangi so'z hosil bo'lganini ko'rishimiz mumkin:

amal →	amal- <b>dor</b>	→ amaldor- <b>lik</b>
	amal- <b>iy</b>	→ amaliy- <b>ot</b>
	amal- <b>la</b>	→ g'ayri-amaliy
	amal- <b>parast</b>	→ amalparast- <b>lik</b>
	be-amal	→ beamal- <b>lik</b>

Yangi so'z hosil bo'lishiga tayanch, asos vazifasini o'tovchi so'z yasovchi asos hisoblanadi. Yuqoridaq *amal* so'zi o'zidan kelib chiqqan beshta so'z uchun yasovchi asos. O'z navbatida, bu so'zlar keyingi yasalish uchun yasovchi asos vazifasini o'taydi. Yasovchi asosdan yuzaga kelgan so'z esa yasama so'zdir. *Amal* so'zidan hosil bo'lgan beshta so'z va keyingi yasalish bunga misol bo'la oladi.

Yasama so'zni vujudga keltiruvchi turli vosita mavjud. Ular qo'shimcha yoki so'z ko'rinishida bo'lishi mumkin. Bunday vosita lug'atda qoraytirilgan (jirniy) shaklda berildi.

Yasovchi asos va yasama so'z yig'indisi yasalish uyasini tashkil qiladi. Lug'atda har so'zdan yasalgan yasalish uyasi alohida ajratib berildi.

O'quv lug'ati yana quyidagi bilan xarakterlanadi:

1) fe'l an'anaviy lug'atlardagidek shaklda, ya'ni harakat nomi shaklda berilmay, buyruq (o'zak) shaklda berildi:

lov → lov-**illa**, moyil → moyil-**lan**, ayni → ayni-**ma** kabi;

2) so'z yasovchi qo'shimchadan oldin kelgan lug'aviy shakl yasovchi qo'shimchalar ajratilib, qoraytirilmagan ko'rinishda berildi:

maqta →	maqta-n-ar- <b>li</b>
	maqta-n-choq
	maqta-r- <b>li</b>

bela → bela-n-**chak** kabi;

3) omonim so'zlar rim raqami bilan belgilab berildi va ma'nosi izohlab ketildi:

band I (mashg'ul) → band-**lik** (mashg'ullik)

band II (dasta) → band-**li**                                  band-**lik** (dastaliksoplilik);

4) lug'atda asosan affiksatsiya usuli bilan yasalishlar keltirildi;

5) tovush o'zgarishi hodisasining asli "O'zbek tilining so'z tarkibi o'quv lug'ati"da berilgani uchun ko'rsatilmadi:

bo'ya → bo'yo-**q**, ot (ism) → at-**a** → ato-**q** → atoq-**li** kabi.

Lug'atda 3257 ta tub so'z (so'z yasalish uyasi) berilgan bo'lib, ularidan 9443 ta yasama so'z hosil bo'lishi ko'rsatilgan. Demak, bu lug'atda o'rtacha 1 ta so'zdan 3 ta so'z yasalganini ko'rish mumkin. Albatta, lug'at o'zbek tilidagi hamma so'zlarni qamrab olmagan. Faqat eng faollari – maktab o'quvchilari uchun tushunarli bo'lgan so'zlargina lug'atda o'z aksini topgan.
